 Orange County, CA

Education

California State University - Long Beach (September 2011 - June 2015)

Bachelor of Arts Degree - Focus in Art Photography

3.5 GPA, Dean's Honor List (several semesters), President's Honor List (several semesters)

Art Exhibition: *This Image Before Me* (2015), Gatov Galleries, Long Beach, CA

Skills

Front-End Web Development Image Capture and Processing HTML5 CSS3 Sass JavaScript
Node.js Vue.js Nuxt.js Svelte REST APIs Git Bootstrap jQuery MongoDB Web Scraping
Batch Scripting Data Visualization Encryption State Management Visual Studio Code
Chrome Dev Tools Responsive and Mobile-First Design Adobe Creative Suite ImageMagick FFmpeg
Audacity Problem-Solving Self-Taught / Self-Starter ~90 WPM Type Speed Highly Organized

Languages

English (Fluent), Spanish (Basic), German (Basic)

Project Showcase

IMDb Top 250 TV Shows

Used [Node.js](#), [batch files](#), [cURL](#), and [ImageMagick](#) to scrape data as well as download and resize images from [IMDb](#) pages for 250 TV shows. [Vue.js](#) and [Nuxt.js](#) were used to render content server-side and create dynamic pages for each TV show. [Chart.js](#) was used to create charts for the ratings for every season of each TV show.

To Do List

Used [Vue.js](#) along with [BootstrapVue](#) components, icons, and classes to quickly scaffold the project. [Vuex](#) was used for state management, the [file-saver](#) package was used to export data as JSON, and the [FileReader](#) web API was used to read previously saved files.

U.S. Congress 117

Used [Node.js](#), [batch files](#), [cURL](#), and [ImageMagick](#) to scrape data as well as download and resize images from 3 APIs and a webpage. [Vue.js](#) and [Nuxt.js](#) were used to render content server-side and create dynamic pages for each representative. [Chart.js](#) was used to create 13 charts for congress as a whole and several charts for each representative.

Time Tracker

[Vue.js](#) was used to build the project. Mathematics and the [moment](#) package were used to create dynamic progress bars which visualize several durations of time. The project was also recreated using the [Svelte](#) framework.
